

ANNEX 2 - PLANNING AND CHECKING FORM

INNOVATION AND EXCELLENCE LABORATORY - LABINNOVA

Table 1. *Product script*

ITEM	ITEM NAME	DESCRIPTION	CHECK/teacher observations LABINNOVA
1	Name of resource	See It, Hear It, Say It! – An Interactive English Learning Resource for Young Learners	
2	Gamified Resource		
	Digital Educational Resource	This is a digital resource designed to support young children's early English language development (ages 2–5) through three foundational skill areas: • Listening: recognizing familiar words, sounds, and simple instructions through songs, audio prompts, and repetition. • Speaking: repeating words, naming objects, and responding with single words or short phrases. • Pre-writing (Motor Skills): tracing lines, shapes, and letters, and interacting with simple visual prompts to develop fine motor coordination.	
3	Problem to be solved	Children between 2 and 5 years old who are beginning to learn English need engaging and developmentally appropriate experiences. At	

		this stage, they are still developing attention span, motor skills, and basic language awareness. Traditional methods often focus too early on reading and writing, which can be frustrating for young learners. There is a need for playful, interactive resources that support early English exposure through listening, speaking, and exploration, making learning natural and enjoyable.	
4	Purpose of the Resource	The purpose of this gamified resource is to introduce English in a fun and engaging way, supporting early language development through listening, repetition, and play-based interaction.	
5	Resource Learning Objective	By completing this resource, children (ages 2–5) will be able to: 1. Listening: Recognize and respond to at least 5–8 familiar English words (e.g., colors, animals, objects). 2. Speaking: Repeat or say simple words and short expressions with teacher support. 3. Pre-writing / Motor Skills: Trace basic lines, shapes, or letters and interact with visual elements on screen.	

6	Academic and disciplinary content proposal	This resource focuses on early English exposure through familiar and meaningful topics: • Colors • Animals • Everyday objects • Numbers Content is presented through songs, repetition, visuals, and simple interaction, not formal reading or writing tasks.	
7	Proposal of multimedia resources (videos, images, audios, among others).	The resource incorporates a variety of multimedia elements designed to support early English language exposure through visual, auditory, and interactive experiences appropriate for young learners: • Audios: Short, clear pronunciation clips using simple words, sound effects, and songs to promote listening and repetition. • Videos: Brief animated videos (15–30 seconds) presenting vocabulary through movement, music, and repetition, helping children connect meaning with visual context. • Images: Bright, colorful, and age-appropriate illustrations of animals, objects, and colors that support vocabulary	

		recognition without relying on reading skills. • Interactive Slides: Simple click, tap, and drag activities where children can match images, select answers, and explore content in a playful way. • Songs and Chants: Repetitive and rhythmic songs that encourage participation, memory, and pronunciation through imitation. • Tracing Animations: Visual guides for tracing lines, shapes, or basic letters to support early motor skill development.	
8	Learning Strategy	The resource uses a play-based and gamified learning approach, appropriate for early childhood education. Activities are short, visual, and interactive, promoting: • Attention and engagement • Repetition and imitation • Physical interaction (clicking, dragging, pointing) • Early English oral production	
	Learning activities		

9	Challenges, games, questions, among others	Listen & Touch: Children hear a word and tap the correct image. Repeat After Me: Children listen and repeat simple words. Drag & Match: Match images (no reading required). Trace & Play: Trace shapes or letters with visual guidance. Sing Along: Short songs to reinforce vocabulary.	
10	Feedback in line with content and purpose	Feedback is immediate, visual, and encouraging: • Sounds, animations, and stars reinforce participation • No penalties for mistakes • Teacher provides positive reinforcement and models correct pronunciation	
11	Interactivity	The resource promotes active participation through play, allowing children to: • Touch, drag, and explore • Listen and repeat • Engage physically and verbally All activities are designed to match short attention spans and developmental needs.	
	Target audience	Young learners aged 2 to 5 years old, at a Pre-A1 emergent level, in early childhood education settings (nursery, preschool, kindergarten).	

Table 2. *Student's data.*

Student's name(s)	Diana Carolina Acevedo Mouawd Richard Jesus Riaño peña
Bachelor's Degree	LICENCIATURA EN LENGUAS EXTRANJERAS CON ÉNFASIS EN INGLÉS
Course(s)	TECHNOLOGY IN FOREIGN LANGUAGE TEACHING - (518006A_2201)
Support Teacher	Valeria Maria Eraso Ibarra

Note. This table serves as a planning and checking form for educational resources developed within the Innovation and Excellence Laboratory (LABINNOVA). It includes fields for the name and type of the resource, problem to be solved, purpose, learning objectives, content proposals, multimedia resources, learning strategies and activities, interactivity, and target audience, along with spaces for teacher observations and checks. Licenciatura en Lenguas Extranjeras con Énfasis en Inglés. (2024)

Instructions for filling out the form:

1. Name of resource:

- Provide a clear and descriptive name for your educational resource.

2. Gamified Resource / Digital Educational Resource:

- Specify whether the resource is gamified or a digital educational resource.

3. Problem to be solved:

- Describe the specific problem or educational challenge that this resource aims to address or solve.

4. Purpose of the Resource:

- Clearly state the overall purpose or objective of creating this educational resource.

5. Resource Learning Objective:

- Define the specific learning objective(s) that students should achieve by using this resource.

6. Academic and Disciplinary Content Proposal:

- Outline the academic or disciplinary content that the resource will cover. Include key topics or subjects.

7. Proposal of Multimedia Resources (videos, images, audios, among others):

- Detail the multimedia elements that will be incorporated into the resource to enhance learning (e.g., videos, images, audios).

8. Learning Strategy:

- Explain the approach or strategy that will be used to facilitate learning through this resource. Consider instructional methods and pedagogical principles.

9. Learning Activities:

- Provide details for each component:
 - **Challenges, games, questions, among others:** Describe specific challenges, games, or questions that students will engage with.
 - **Feedback in line with content and purpose:** Outline how feedback will be provided to students, ensuring it aligns with the content and educational purpose.
 - **Interactivity:** Describe how the resource will encourage interactive engagement from students.
 - **Target audience:** Specify the intended audience or recipients who will benefit from using this educational resource.
