

TECHNOLOGY IN FOREIGN LANGUAGE TEACHING

Lesson Plan	Student's name: Carolina Acevedo Mouawd and Richard Peña	
	Group: Starters kids pre A1	Date: April 18, 2026
Theme/Topic:	Colors	Duration: 120 minutes

Learning Objective (SMART):	By the end of the 120-minute lesson, students (Starters kids pre A1) will be able to identify, recognize, and orally name at least 4 basic colors (red, blue, yellow, green, pink, white, black, orange, purple) through interactive digital and physical activities with 80% accuracy, as assessed by a Kahoot game and a hands-on classification task.
	Know: Basic color vocabulary (red, blue, yellow, green, pink, white, black, orange, purple).
	Understand: Colors can be identified and used to describe objects in their environment.
	Be able to Do: Identify and orally name at least 5 colors using simple expressions such as <i>It's red</i> .
	Flipped Classroom Component: Before the lesson, students watch a short color-introduction video shared by the teacher via Google Classroom. During the lesson, students apply this knowledge through interactive digital and hands-on activities.
	Approach: Task-Based Intercultural Learning (TBIL)
	Methodology: Flipped Classroom + Gamified Learning
	Main Target Skill: Speaking (supported by listening and recognition)

Problem Anticipation	Students may lose attention quickly: Use dynamic and short activities (max 15 min each).
----------------------	---

	Some students may not recognize colors: Use visual aids, repetition, and peer support.
--	---

Vocabulary:	Materials Required:
Brick words: red, blue, yellow, green, pink, white, black, orange, purple. Target expressions: It's [color]. / What color is it? / I see [color]!	Digital Tools: • Google Classroom (LMS / Flipped Classroom) • Wordwall (memory game) • Kahoot (gamified assessment) • Sheppard Software (drag-and-drop) • Plays.org (color game) Physical Materials: • Hula hoops (color sorting circles) • Flashcards (colors) • Plastic animals & colored blocks/balls

Flipped Classroom Component (Pre-Class – Google Classroom)

LMS Platform: Google Classroom

Resources uploaded for students to explore before class:

1. Video: A short, teacher-curated YouTube video introducing basic color vocabulary with visual examples and pronunciation modeling (approx. 3–5 min).
2. Digital Presentation (Canva): A colorful slide deck with each color, its name, and a real-world object of that color.
3. Interactive Quiz (Wordwall): A matching quiz where students drag color names to the correct color swatches — completed at home before class.

Evidence of participation: Screenshots of Wordwall completion and Google Classroom access logs will be reviewed at the start of class.

PRE-TASK (0–20 min) | Activate Prior Knowledge + Flipped Classroom Review

Activity 1 – Flipped Classroom Check-in (5 min): Teacher asks: *What colors did you see in the video?* Students respond. Teacher uses color flashcards to confirm vocabulary and models pronunciation.

Activity 2 – Digital Game Warm-Up: Plays.org Color Game (10 min): Students play a fast-paced digital color recognition game on the projector screen. Teacher calls colors aloud and

students respond by pointing or saying the color name. Promotes engagement and activates prior home learning.

Activity 3 – Presentation (5 min): Teacher presents the topic using the Canva slide deck from Google Classroom. Models pronunciation and uses gestures/visuals. Gradually transitions from teacher-led to student responses.

DURING-TASK (20–80 min) | Communicative Tasks + Hands-On Learning

Activity 4 – Wordwall Memory Game (15 min): Students the memory game matching color names to color swatches. Teacher monitors, models pronunciation, and encourages students to say each color aloud as they flip cards.

Activity 5 – Sheppard Software Drag-and-Drop (15 min): Students complete an interactive drag-and-drop activity identifying and sorting colors. Teacher circulates, provides corrective feedback in a positive tone, and encourages peer help.

Activity 6 – Hula Hoop Color Classification (20 min | Intercultural TBIL Task): Physical materials (plastic animals, colored blocks, balls) are scattered on the floor. Each hula hoop is labeled with a color. Students (in pairs) physically sort objects by color, naming each object as they place it: *The ball is red*

Transition (10 min): Quick group sharing. Each pair shares one object they sorted: *We put the [object] here because it is [color]*. Teacher provides positive feedback.

POST-TASK (80–110 min) | Consolidation, Production & Feedback

Activity 7 – Kahoot Color Quiz (20 min | Assessment + Production): Students participate in a Kahoot game with color-related questions (identify the color, name the color shown, What color is this animal?). Students respond orally. Teacher pauses between questions to reinforce correct answers and provide form-focused feedback.

Activity 8 – Production: I See Colors (10 min): Each student independently picks 3 objects from the classroom and describes their color using the target expression: *It's [color]*.. Teacher listens and provides encouraging feedback. No correction of pronunciation errors in front of peers; private positive correction only.

CLOSURE (110–120 min) | Reflection & Wrap-Up

Teacher leads a quick whole-class reflection:

- *What colors did we learn today?*
- *Which activity was your favorite?*
- Teacher reinforces the Flipped Classroom link: *Remember the video we watched at home? Now you know all those colors!*
- Students receive a sticker or digital badge on Google Classroom for participation.

Assessment

Formative Assessment (ongoing throughout lesson):

- Teacher observation during Activities 4, 5, 6: checks for correct identification and oral production of color names.
- Wordwall completion screenshot (pre-class Flipped homework): checked at start of class.

Summative Assessment:

- Kahoot Quiz (Activity 7): minimum 5/9 correct answers = 80% accuracy target met.
- I See Colors! Production Task (Activity 8): students correctly name at least 5 colors independently.
- Teacher uses a simple 3-point checklist per student: (1) Identifies color visually, (2) Names color orally, (3) Uses target expression correctly.

Technology Integration

Digital tools are integrated across all lesson stages:

- Google Classroom (LMS): pre-class video, presentation, and Wordwall quiz; participation evidence collected here.
- Wordwall: memory game promotes active recall and pronunciation practice.
- Kahoot: gamified assessment provides immediate feedback, increases motivation, and allows teacher to gauge group understanding in real time.
- Sheppard Software: structured digital practice with self-correcting drag-and-drop tasks.
- Plays.org: fast-paced warm-up game that activates engagement from the first minute.

These tools promote active participation, support visual learners, and allow students to practice language in meaningful, contextualized, and culturally relevant situations.
